

## Professors' Efforts in Promoting Hindi in Technical Education

.On **January 10, 2025**, on the occasion of World Hindi Day, professors in engineering and medical colleges were honored for their remarkable efforts in supporting Hindi-speaking students. Dr O.P. Chauhan, Dr Gopal Meena, and Dr Bhupendra Gupta from Jabalpur Engineering College have translated engineering course books into Hindi, making technical subjects more accessible. Their work involved deciphering technical terminology and crafting

accurate Hindi equivalents, ensuring that complex concepts are easier to understand. Similarly, professors from the city's medical college have translated books on medicine and research into Hindi, helping students learn without language barriers. In recognition of their efforts, the three engineering professors were honored by hon'ble Governor Mangu Bhai Patel at a ceremony held at Rajiv Gandhi University, Bhopal. Their work aligns with the vision of World Hindi Day, celebrated every year on January 10 to promote the global reach of Hindi. Since the first World Hindi Conference in Nagpur in 1974, this day has been dedicated to making Hindi more

accessible to the common people.

Principal, Dr Rajiv Chandak opined that the dedication of these professors ensures that more students can pursue education in their preferred language, making learning more effective.

## Professors Promote Hindi in Technical Education, Sharing Translation Challenges on Hindi Diwas

Engineering course books were translated into Hindi to make technical subjects more accessible. In recognition of this effort, the professors were honored by Governor Mangu Bhai Patel at Rajiv Gandhi University. This dedicated work was carried out by Dr. O.P. Chauhan, Dr. Gopal Meena, and Dr. Bhupendra Gupta from the Government Engineering College. To further share their experiences, the three professors spoke at a special Hindi Diwas event organized by the Civil Engineering Department. They discussed the challenges of translating technical terminology while ensuring accuracy and preserving the core meaning of concepts. They also emphasized how their work helps to bridge the language gap for Hindi-speaking students.

Principal Dr. Rajiv Chandak felicitated the event and praised the professors for their dedication to promoting Hindi in technical education. He highlighted how such initiatives empower students by enabling them to grasp complex subjects more effectively in their native language.

The event also featured speeches and Hindi poetry recitations by students, who showcased their oratory skills and appreciation for the Hindi language.
